Aluminium composite panels

Small Quantity Offer

NEW: 25 colours available!

ALUMINIUM COMPOSITE PANELS: ALREADY AVAILABLE FROM 150 M²!

ALPOLIC™ aluminum composite panels consisting of two skins of 0.5mm thick aluminum coated with high-quality lacquer systems and a flame-retardant or non-combustible core material. They are characterized by easy processing, formability, excellent flatness, bending stiffness and weather resistance. In addition, they are impact and break resistant and very durable. The ideal material for sophisticated façade design for both existing and new buildings.

We supply our standard colour range with 25 "CLASSIC" colours from **a small quantity of only 150 m²**. This means maximum flexibility and a reduction in storage costs.

Hint: The representation of the colours corresponds to the printing possibilities. We recommend an exact colour matching based on an original colour sample. You are welcome to request colour samples from us. Due to the production process, slight colour deviations may occur with colours from different production batches. We therefore recommend that you order the total quantity for a project in one order.
